STEP 2: Create your own custom application with fields that pertain to your application:

\$299 – Flat Rate Cost – Provides the ability to create any custom application!

The image displays three screenshots of a custom mobile application interface for Stony Brook University. The first screenshot shows an 'Inventory' screen with fields for Item #, Quantity, Location, User I.D., and Warehouse Location, along with a 'STONY BROOK UNIVERSITY' logo. The second screenshot shows a 'Repairs Performed' screen with a table for Job Info (HRS., LABOR, RATE, AMOUNT) and buttons for 'Photo 1', 'Photo 2', 'Add Parts to Work Order', 'Main', 'Finish Order', and 'Done'. The third screenshot shows a 'SCAN TICKETS' screen with a 'Scan Ticket' field and a 'SCAN ITEMS' screen with fields for Location, Scan RFID, Manufacturer, Type, Model, and Serial Number, along with a 'View Scanned Items' button.

STEP 3: Import your data onto your PC and manipulate / manage / modify it using Microsoft Excel, Microsoft Access, or any other compatible program:

Option #1: Import it manually by the “copy and paste” method – FREE

Option #2: Import it automatically with a Microsoft Excel import tool + \$599
